# **Project Planning Phase**

### **Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)**

| Date          | 18 October 2022  |
|---------------|--|
| Team ID       | PNT2022TMID36002   |
| Project Name  | Early Detection of Chronic Kidney Disease using Machine Learning |
| Maximum Marks | 8 Marks  |

#### **Product Backlog, Sprint Schedule, and Estimation (4 Marks)**

Use the below template to create product backlog and sprint schedule

| Sprint   | Functional<br>Requirement (Epic) | User Story<br>Number | User Story / Task  | Story Points | Priority | Team Members                          |  |
|----------|----------------------------------|----------------------|--|--------------|----------|---------------------------------------|--|
| Sprint-1 | Data Collection                  | Task-1               | To build the machine learning model, we begin with the process of downloading the dataset and then perform data analysis | 4            | Low      | Sandhya S                             |  |
| Sprint-1 | Data Analysis                    | Task-2               | We import the required libraries and then perform data analysis on the given dataset.                                    |              |          | Nithyakamal<br>Ilamurugu              |  |
| Sprint-1 | Data Pre-processing              | Task-3               |  |              | Medium   | Gnanavarshini M                       |  |
| Sprint-1 | Building Login Page              | USN-1                | As a user, I can log into the application through a mail and password 5  |              | High     | Pooja<br>Balasubramanian              |  |
| Sprint-2 | Register Page                    | USN-2                | As a new user, I can register for the application 5 through email.   |              | High     | Sanjay Kannan M                       |  |
| Sprint-2 | Splitting the dataset            | Task-4               | Splitting dataset into train and test split.   | 3            | Medium   | Gnanavarshini M                       |  |
| Sprint-2 | Building the Model               | Task-5               | Build three different ML models for classification and prediction.   |              | High     | Sandhya S<br>Nithyakamal<br>Ilamurugu |  |
| Sprint-3 | Home Page                        | USN-3                | As a user, I can view the symptoms of CKD and 5 Medium test vitals required for its prediction.                          |              | Medium   | Gnanavarshini M                       |  |
| Sprint-3 | Comparing different ML Models    | Task-6               | Evaluating each model and choosing the one with better accuracy.   | 3            | Low      | Pooja<br>Balasubramanian              |  |

| Sprint   | Functional<br>Requirement (Epic) | User Story<br>Number | User Story / Task                               | Story Points | Priority | Team Members                 |
|----------|----------------------------------|----------------------|---|--------------|----------|------------------------------|
| Sprint-3 | Creating User Database           | Task-7               | Storing the user login details in the database. | 12           | High     | Sandhya S<br>Sanjay Kannan M |
| Sprint-4 | Prediction Page                  | USN-4                | As a user, I can view the test results.         | 5            | Low      | Sanjay Kannan M              |
| Sprint-4 | Train model on IBM<br>Cloud      | Task-8               | Train the ML model on IBM Watson.               | 7            | Medium   | Nithyakamal<br>Ilamurugu     |
| Sprint-4 | Flask Integration                | Task-9               | Integrating the HTML files with the ML model.   | 8            | High     | Pooja<br>Balasubramanian     |

## Project Tracker, Velocity & Burndown Chart: (4 Marks)

| Sprint   | Total Story<br>Points | Duration | Sprint Start Date | Sprint End Date<br>(Planned) | Story Points Completed (as on Planned End Date) | Sprint Release Date<br>(Actual) |
|----------|-----------------------|----------|-------------------|------------------------------|---|---------------------------------|
| Sprint-1 | 20                    | 7 Days   | 24 Oct 2022       | 29 Oct 2022                  | 20  | 31 Oct 2022                     |
| Sprint-2 | 20                    | 6 Days   | 31 Oct 2022       | 05 Nov 2022                  | 20  | 05 Nov 2022                     |
| Sprint-3 | 20                    | 6 Days   | 07 Nov 2022       | 12 Nov 2022                  | 20  | 12 Nov 2022                     |
| Sprint-4 | 20                    | 6 Days   | 14 Nov 2022       | 19 Nov 2022                  | 20  | 19 Nov 2022                     |

#### Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{sprint\ duration}{velocity} = \frac{20}{10} = 2$$
